CODEX × TWITCHCON HACKATHON

Chat Ships It

Viewers redeem a feature. Codex builds it live on the overlay.

Green Robin Labs · Northbridge · 2026

The gap

Chat wants to play.
Overlays stay static.

Polls & Twitch Plays

Been done. Judges asked for original ideas.

Custom overlays

Dev time per widget. Chat can't invent mid-stream.

AI co-hosts

Talks about the stream. Doesn't change what's on screen.

The mechanic

Codex is the gameplay.

01

Redeem

Viewer spends channel points: “Ship a Feature”

02

Approve

Mod runs !ship — nothing ships without a human

03

Build

Overlay shows Codex plan → diff → tests

04

Hot-load

Sandboxed widget appears. Feature by @viewer

Sandbox: iframe allow-scripts · CSP blocks network · size/CPU budget · 30s kill switch · OpenAI moderation on prompts

Try it

Live in one click.

Why we win

Innovation · Impact · Codex · Design

Codex isn't a footnote — it's what chat is watching.
Built for streamers. Fun for communities. Ready for the TwitchCon stage.
